PROFESSIONAL SUMMARY

Analytics professional with 9 years of experience turning operational data into clear reporting, performance insights, and practical process improvements. Combines logistics and business operations expertise with SQL, Excel, Tableau, Power Query, and Python to build dashboards, automate recurring work, validate data, and communicate findings to technical and nontechnical stakeholders.

TECHNICAL & BUSINESS SKILLS

Analysis & reporting: SQL (joins, CTEs, aggregations, validation); KPI development; trend and root-cause analysis; ad hoc reporting

Tools: Excel (Power Query, PivotTables, formulas, VBA); Tableau; Python (pandas, NumPy); Google Sheets; Git/GitHub

Business: Dashboard development; data cleaning; workflow automation; requirements gathering; process documentation; stakeholder training

Systems & domains: SAP; Oracle; transportation and logistics analytics; capacity planning; carrier performance; operational reporting

PROFESSIONAL EXPERIENCE

Logistics Analyst | Applied Materials

Austin, TX | Dec 2018 - Dec 2025

- Built and maintained Excel and Tableau dashboards for weekly operations reviews and quarterly leadership reporting, translating shipment, capacity, and service data into clear performance insights.
- Automated recurring reporting and workflow steps with Excel, Power Query, VBA, and connected data sources, reducing manual coordination and reporting effort by more than 50%.
- Designed and launched a Microsoft Bookings dock-scheduling solution across five Austin warehouses, supporting 10-15 carriers and freight forwarders and improving visibility into 30-50 daily shipments.
- Analyzed carrier, shipment, and warehouse data to identify bottlenecks, investigate exceptions, and support root-cause analysis during an Oracle-to-SAP transition.
- Partnered with operations leaders and cross-functional teams to define KPIs, translate business questions into reporting requirements, and recommend data-informed process improvements.
- Created process documentation and trained 10-15 internal and external users, improving adoption, reporting consistency, and repeatability of operational workflows.

Logistics Analyst | Adecco (Contract at Applied Materials)

Austin, TX | Oct 2016 - Dec 2018

- Analyzed logistics and operational performance data to identify service risks, recurring issues, and process-improvement opportunities.
- Created standardized Excel reports and KPI templates that improved reporting consistency and day-to-day visibility for stakeholders.

Logistics Analyst | CEVA Logistics (Contract at Applied Materials)

Austin, TX | Feb 2016 - Oct 2016

- Monitored operational KPIs and validated reporting data to support shipment performance, accuracy, and process consistency.

PROFESSIONAL EXPERIENCE (CONTINUED)

Claims Analyst | Xerox

Austin, TX | Jan 2014 - Jan 2015

- Reviewed claims and operations data, resolved discrepancies, and supported efficiency and accuracy improvements.

National Account Specialist | Blue Cross Blue Shield of Michigan

Detroit, MI | Jan 2011 - Jan 2014

- Supported enterprise accounts through reporting, issue coordination, and client-facing problem solving in a regulated healthcare environment.

SELECTED ANALYTICS PROJECTS

Transportation Intelligence Dashboard | SQL, Tableau

- Built an end-to-end transportation dataset and dashboard tracking on-time delivery, average transit time, delayed shipments, carrier utilization, and freight cost per unit.
- Used SQL to join, aggregate, and validate shipment, lane, and carrier data; designed interactive views for carrier and route performance analysis.

Operational Booking Scheduler | Python, Flask, HTML/CSS, GitHub

- Developed a web application to streamline appointment booking, manage availability, prevent scheduling conflicts, and improve operational visibility.
- Documented the workflow and code in GitHub to demonstrate requirements translation, application logic, and process automation.

Credit Card Fraud Analysis | Python, R, machine learning

- Cleaned and analyzed imbalanced transaction datasets and compared classification approaches using precision, recall, F1, and related performance metrics.

EDUCATION

M.S., Data Science | Bellevue University

2025

Certificate, Web Development | The University of Texas at Austin

2017

B.A., Communication & Media Studies | Grand Valley State University

2009
